What Is JSON

Swipe →

Advantages

- ✓ **Language independent**
- ✓ **Text-based**
- ✓ **Lightweight data-interchange format**
- ✓ **Easy for humans to read/write**
- ✓ **Easy for machines to generate/parse**

Swipe →

- **Data is in name/value pairs**
- **Data is separated by commas**
- **Curly braces hold objects**
- **Square brackets hold arrays**
- **Value can be string, number, object, array, boolean (true/false), or null**

```
{  
  "firstName": "Aldo",  
  "middleName": "Ignata",  
  "lastName": "Chandra",  
  "address": {  
    "street": "Skyline",  
    "city": "Asgard",  
    "state": "AS"  
  },  
  "phoneNumbers": [  
    {  
      "type": "Home",  
      "number": 0123456  
    },  
    {  
      "type": "Phone",  
      "number": 0123456  
    },  
  ],  
  "age": 17,  
  "children": [],  
  "spouse": null  
}
```
