CSS flex

The flex property may be specified using one, two, or three values.

1. `flex : 1` —> A number or keyword to set the flex-grow property. Rest default values Flex-shrink will be 1, and flex-basis will be 0
2. `flex : 1 3` —> A number or keyword to set the flex-grow property. The second must be either a number to set the flex-shrink or a width value for the flex-basis
3. `flex : 1 2 3` —> Is explained in the image.
