*The ultimate CSS tools for web designers*

#### Gradient Generator

Use multiple colors and opacity stops to get amazing gradients.

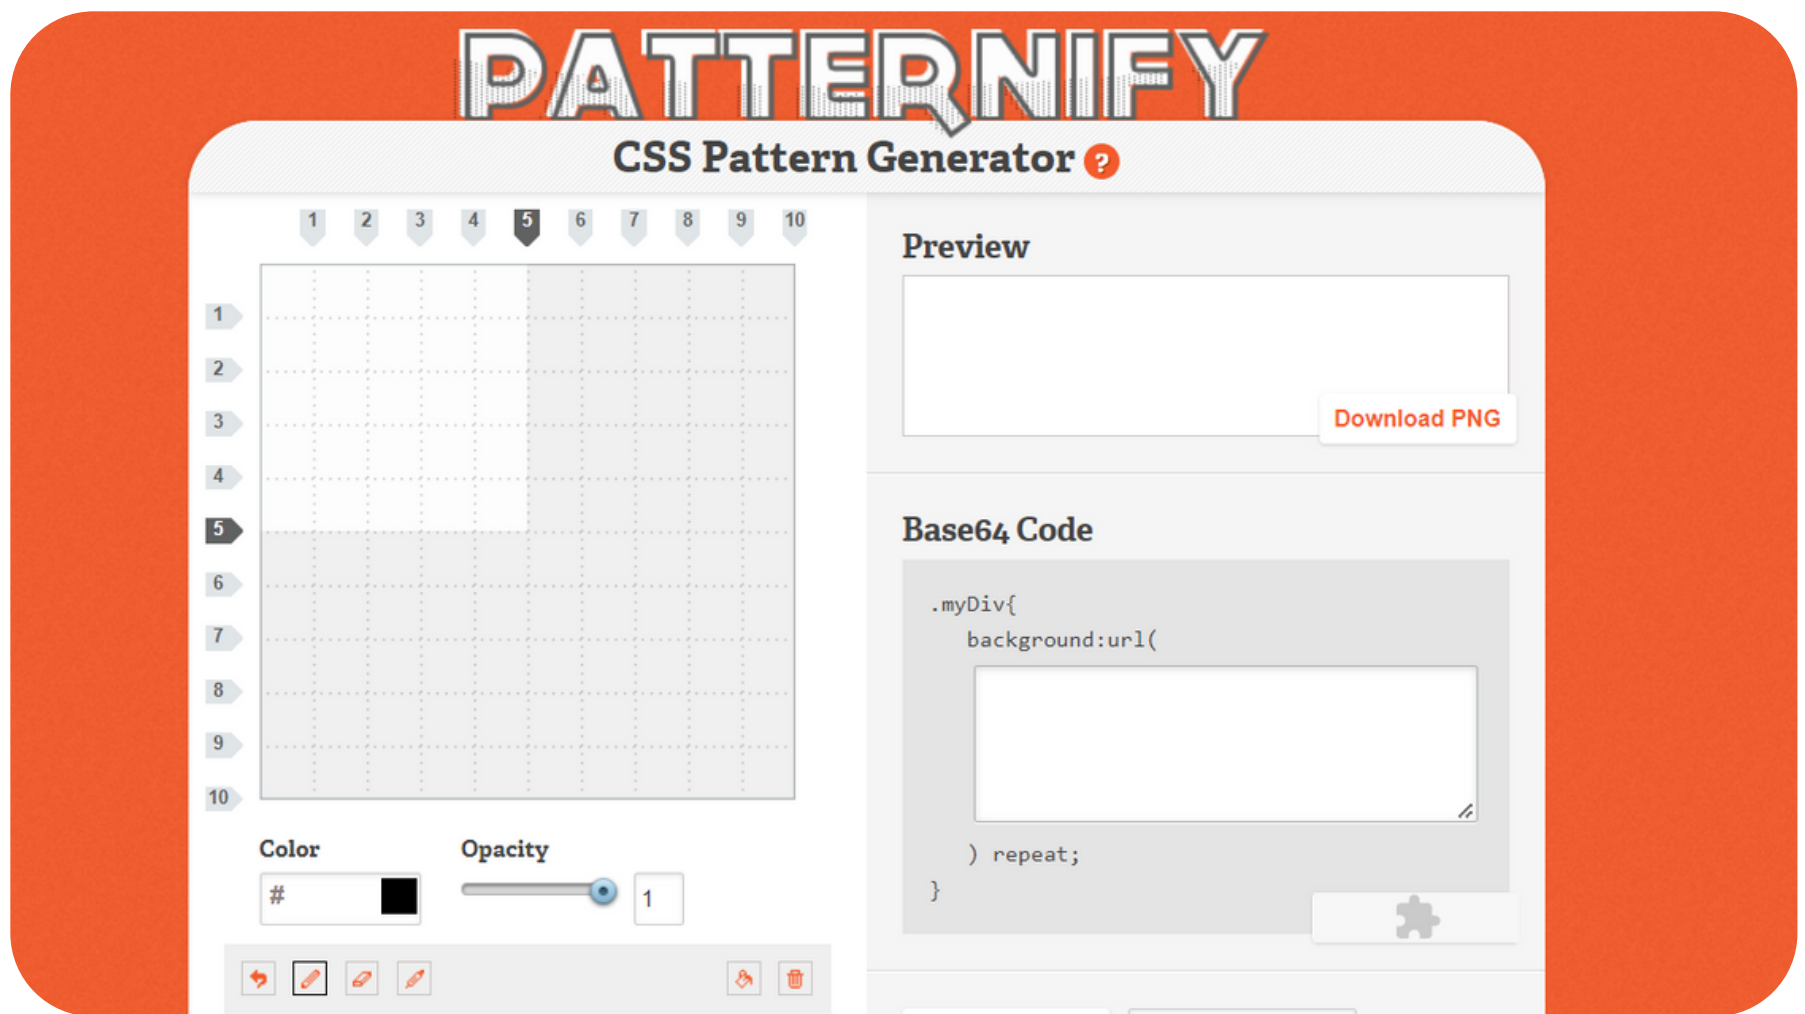

These gradients can be used as background images of banners, wallpapers, buttons or tables and in many other applications.

#### Border Radius

Super easy to use and a super time saver. Change all the borders selected at the same time.

## WAIT! ANIMATE

CSS doesn't provide a property to pause an animation before it loops around again. Yes, there's `animation-delay` but this simply denotes a delay at the very start of the animation, when the element is first shown. **WAIT! ANIMATE** calculates updated keyframe percentages given a *wait* time meaning you can insert a delay between each animation iteration using pure CSS, without JavaScript.

Class Name

waitAnimate

Wait Time

-

1

+

Seconds

Animation Duration

-

2

+

Seconds

Timing Function

linear

ease

ease-in

ease-out

Calculated Keyframes

```
/*
Generated by
waitanimate.wstone.uk
*/

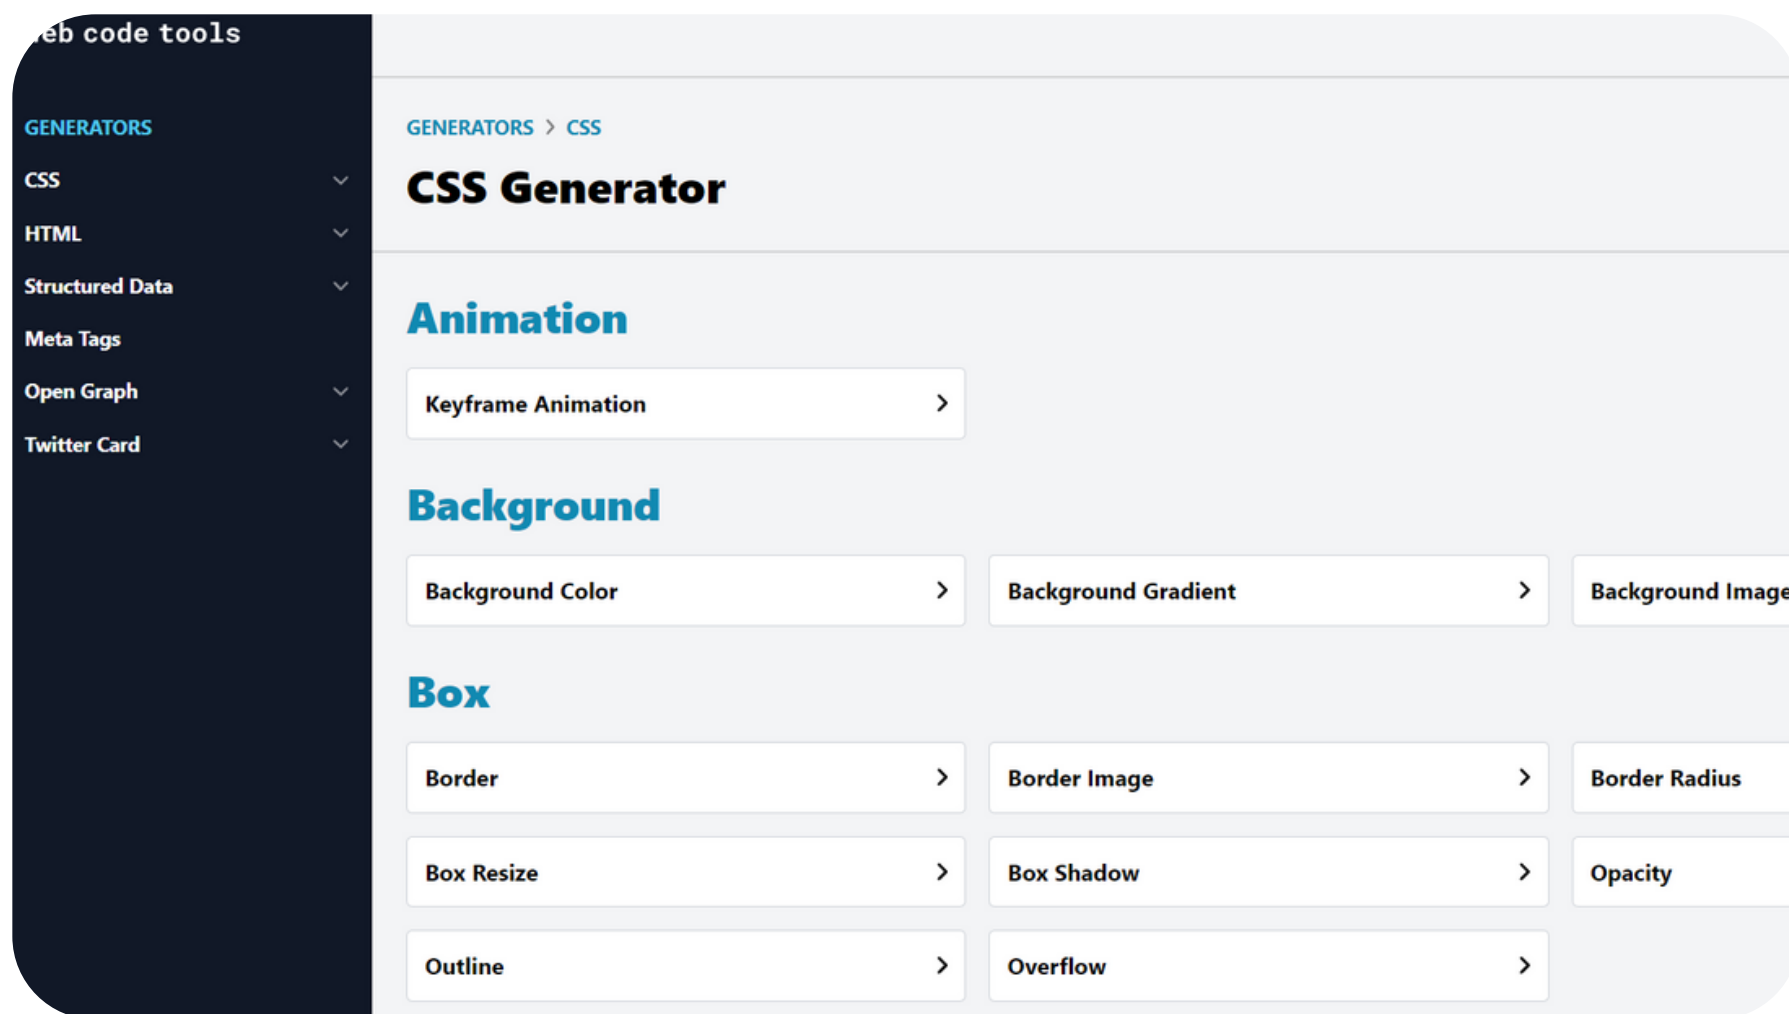

.waitAnimate {
  animation: waitAnimate_544336509 3s linear infinite;
  transform-origin: 50% 50%;
}

@keyframes waitAnimate_544336509 {
  0% {
    transform: perspective(100px) rotate(0deg)
```
