

CSS BORDER

# CSS BORDER PROPERTY SIMPLIFIED !!!

Follow @PriteshKiri

# CSS BORDER

Css border is a shorthand. Before that let me show you the individual border properties. Following are the border properties.

- Border width
- Border color
- Border Style
- Border radius
- Border sides
- Border shorthand

Let me take you through each of them in detail :

## CSS BORDER

### ➤ CSS border width :

Helps us set the thickness of the border

### ➤ CSS border color :

Helps us color the border.

# CSS BORDER

## ➤ CSS border-style :

This is used to give the following styles to the borders:

- solid
- double
- groove
- dashed
- dotted
- ridge
- inset
- outset
- none
- hidden

There is also a shorthand for styles. You can use 4 different styles on 4 sides. Let me show you...

## CSS Border

border-style

CSS

```
border-style: solid;
```

Coffee + Code

```
border-style: double;
```

Coffee + Code

```
border-style: groove;
```

Coffee + Code

```
border-style: dashed;
```

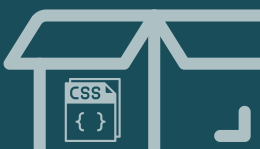

Coffee + Code

```
border-style: dotted;
```

Coffee + Code

## CSS Border

border-style

CSS

```
border-style: ridge;
```

```
border-style: inset;
```

```
border-style: outset;
```

```
border-style: none;
```

```
border-style: hidden;
```

```
border-style: dotted  
groove dashed ridge;
```

OUTPUT

Coffee + Code

Coffee + Code

Coffee + Code

Coffee + Code

Coffee + Code

Coffee + Code

## CSS BORDER

### ➤ CSS border radius :

Helps us curve the border of the box on which the border property has been applied.

### ➤ CSS border sides :

The best thing about the border is that we can set different properties on each side, unlike the CSS outline property.

# CSS BORDER

## ➤ CSS border

The border is a shorthand for width, style, and color :

```
border: border-width | border-style |border-color
```
