

EASILY CREATE GRADIENT TEXT STROKE

```
h1 {  
  background: linear-gradient(  
    45deg, #4158D0 0%, #C850C0 50%, #FFCC70 100%  
  );  
  color: black; /* 💡 should be same as bg color of container */  
  -webkit-background-clip: text;  
  -webkit-text-stroke: 6px transparent;  
}
```

CODE WITH SHRIPAL

This works in all the modern browsers 🎉

CODE WITH
SHRIPAL

codewithshripal.com

How It Works?

1

```
h1 {  
  background: linear-gradient(  
    45deg, #4158D0 0%, #C850C0 50%, #FFCC70 100%  
  );  
}
```

CODE WITH SHRIPAL

Set gradient background image.

2

```
h1 {  
  background: linear-gradient(  
    45deg, #4158D0 0%, #C850C0 50%, #FFCC70 100%  
  );  
  color: black;  
  -webkit-text-stroke: 3px white;  
}
```

CODE WITH SHRIPAL

Set text **color** same as the background color of the container.

Set **-webkit-text-stroke** to add stroke width and color.

3

```
h1 {  
  background: linear-gradient(  
    45deg, #4158D0 0%, #C850C0 50%, #FFCC70 100%  
  );  
  color: black;  
  -webkit-text-stroke: 3px white;  
  -webkit-background-clip: text;  
}
```

CODE WITH SHRIPAL

Set **-webkit-background-clip** to clip the background using **text**. But, as text color is set to black, currently it is not showing the gradient color.

4

```
h1 {  
  background: linear-gradient(  
    45deg, #4158D0 0%, #C850C0 50%, #FFCC70 100%  
  );  
  color: black;  
  -webkit-text-stroke: 6px transparent;  
  -webkit-background-clip: text;  
}
```

CODE WITH SHRIPAL

Change stroke color to transparent, so that the gradient color due to background clipping start showing.

Do you find it helpful? 😊
