

PART - 3

CSS **FLEXBOX** SERIES (FLEXBOX CONTAINER PROPERTIES)

CSS Flexbox

Following are the flexbox container properties:

1. Flex direction
2. Flex wrap
3. Flex flow
4. Justify content
5. Align items
6. Align content
7. Gap

We have already covered first five properties in the previous posts. Let's check out the rest of them!!

CSS Flexbox

6. align-content:

This property helps you align a flex container's lines when there is extra space in the cross-axis, similar to how justify-content aligns individual items within the main axis.

syntax:

➡ align-content: flex-start | flex-end | center | space-between | space-around | space-evenly | stretch

NOTE : This property only takes effect on multi-line flexible containers, where flex-wrap is set to either wrap or wrap-reverse. Not for single-line flex containers.

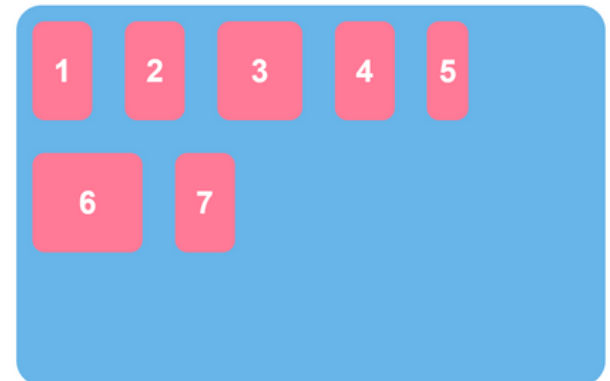

CSS Flexbox Guide

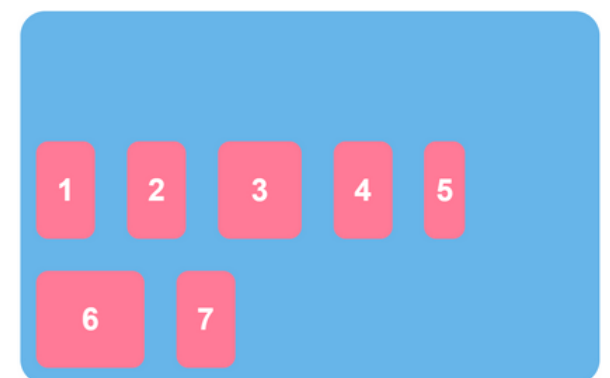

Align content

OUTPUT

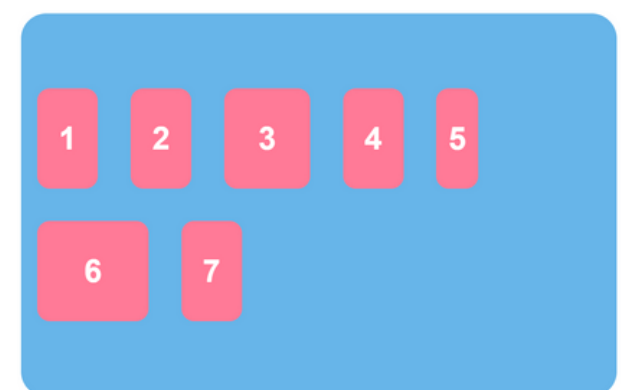

```
.flex-container {  
  display: flex,  
  flex-wrap: wrap,  
  align-content: flex-start }  
→
```

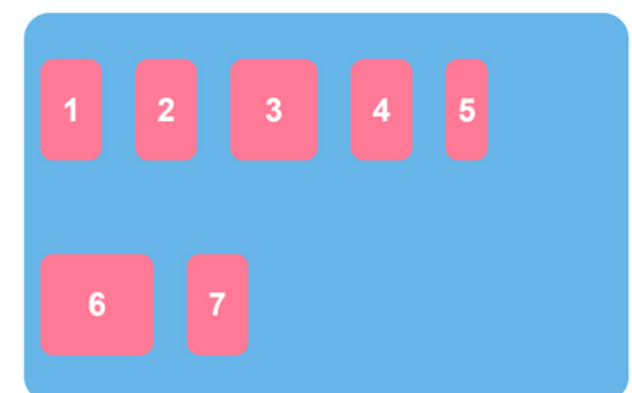

```
.flex-container {  
  display: flex,  
  flex-wrap: wrap,  
  align-content: flex-end }  
→
```

```
.flex-container {  
  display: flex,  
  flex-wrap: wrap,  
  align-content: center }  
→
```

```
.flex-container {  
  display: flex,  
  flex-wrap: wrap,  
  align-content: space-around }  
→
```

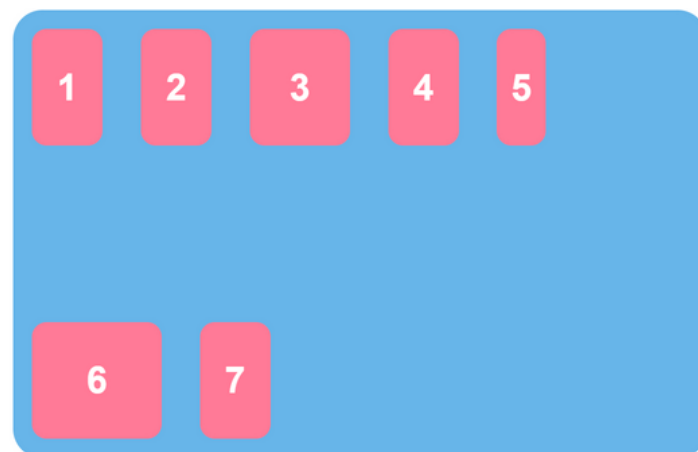

CSS Flexbox Guide

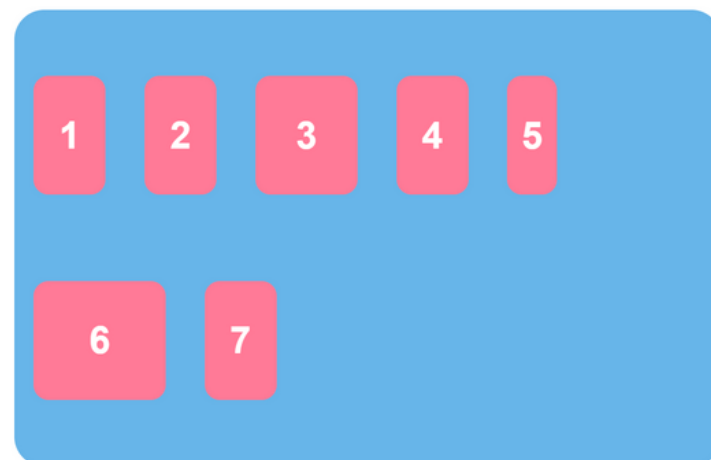

Align content

OUTPUT

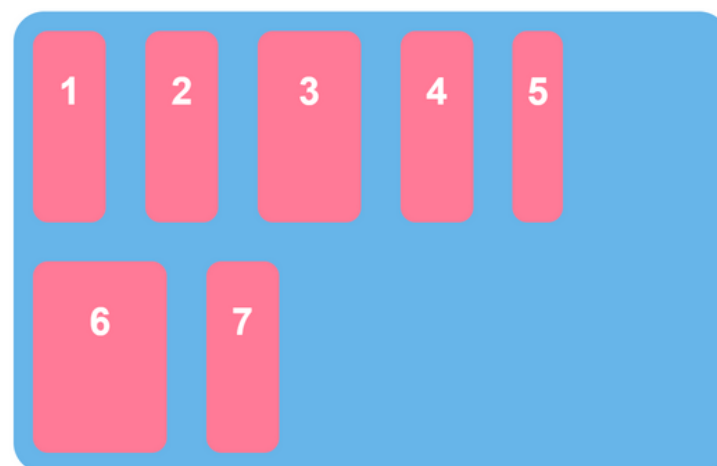

```
.flex-container {  
  display: flex,  
  flex-wrap: wrap,  
  align-content: space-between }
```

```
.flex-container {  
  display: flex,  
  flex-wrap: wrap,  
  align-content: space-evenly }
```

```
.flex-container {  
  display: flex,  
  flex-wrap: wrap,  
  align-content: stretch }
```

CSS Flexbox

7. gap

This property controls the space between flex items. It applies that spacing only between items not on the outer edges.

➡ gap: row-gap column-gap

This was all about the flex container properties. In the next part, we will discuss flex items properties.
