# CSS Text Decoration

In simple terms, text-decoration is used to create decorative lines on the text.

It is a shorthand property for :

- text-decoration-line (required)
- text-decoration-color
- text-decoration-style
- text-decoration-thickness

Let me discuss each of them in detail ....

## ► Text decoration line :

This sets a kind of text-decoration to be used. It could be

- none
- underline
- overline
- line through

Even we can use multiple lines simultaneously.

## Text Decoration

text-decoration-line CSS

`<!-- CSS -->`

`text-decoration-line:  
none;`

`text-decoration-line:  
underline;`

`text-decoration-line:  
overline;`

`text-decoration-line:  
line-through;`

`text-decoration-line:  
overline underline line-  
through;`

## ➤ Text decoration color :

This is used just to color the text decoration lines.

## ➤ Text decoration style :

It is used to style the text decoration lines. It could be

- solid
- wavy
- doubled
- dashed
- dotted

## Text Decoration

## ➤ Text decoration thickness:

It is used to set the thickness of text decoration lines.

We can use the individual text decoration properties or the text-decoration shorthand, depending upon the use case.

## ➤ text-decoration shorthand:

`text-decoration : text-decoration-line | text-decoration-color | text-decoration-style | text-decoration-thickness`
