GitHub Minesweeper

Learn a professional Git workflow with a bot as your teammate. For free!

Start now

As a web developer, you have to work with other devs eventually. And as part of a professional team, you have to know Git and GitHub (or GitLab/BitBucket). These tools are at the core of collaboration among developers.

Unfortunately, you didn't have the chance of working in a dev team yet. So at this moment, your workflow is simple: **You work on the master branch the entire time.**

Git Immersion

A guided tour that walks through the fundamentals of Git, inspired by the premise that to know a thing is to do it.

Git is a powerful, sophisticated system for distributed version control. Gaining an understanding of its features opens to developers a new and liberating approach to source code management. The surest path to mastering Git is to immerse oneself in its utilities and operations, to experience it first-hand.
