CONTROL STATEMENT & LOOPS.

@souravcode

If...Else
Switch Statement
While Loop
Do-While Loop
For Loop
For in Loop
For of Loop
Conditional (ternary)

② IF...ELSE

→ The if Statement executes a statement if a specified condition is **truthy**. if the condition is **falsy** another statement can be executed.

③ SWITCH STATEMENT

→ **Evaluates an expression, matching the expressions value to a case clause, and executes statements associated with that case.**

4 WHILE LOOP

→ The while statement creates a loop that executes a specified statement as long as the test condition evaluates.

5 DO-WHILE LOOP

→ **Do-while loop is a post test loop. it is use when we want to execute loop body atleast one even condition is false .**

6 FOR LOOP

→ **for loop is the most commonly used loop it is use when we want to perform initialisation, condition and increase | decrease operation in single line .**

7 CONDITIONAL (TERNARY)

→ **The Conditional (ternary) operator is the only JavaScript operator that takes three operands**
