1. JSChallenger

JSchallenger is a cool tool to practice most of the primitive and non-primitive data types. It's a very helpful free Javascript resource for beginners

<https://www.jschallenger.com/>

The screenshot shows the JSChallenger website interface. On the left is a sidebar with navigation links: Home, Javascript Basics (0/46), Javascript Practice (0/80), Javascript DOM (0/19), Challenge Rush, Random Challenge, and Login. The main content area features the JSChallenger logo, three introductory boxes about free challenges, levels, and subjects, and two large statistics boxes showing 2,993,855 challenges attempted and 885,197 challenges solved. Below these are sections for 'Next Pick For You' (featuring a 'Start Challenge' card for 'Accessing a variable (1)') and 'Your Progress' (showing 0/145 challenges solved and 0/17 topics completed).
