The screenshot displays the SVGator website's interface for creating CSS loader animations. The header includes the SVGator logo and navigation links for BLOG, TUTORIALS, PRICING, LOG IN, and a SIGN UP button. The main content area features the heading "Create CSS loader animations online" and a subtext: "Power up any website with spinner animations in no time. Create and animate your loader in one place, more easily than ever!". A prominent blue button labeled "Create a CSS loader now" is positioned below the text. At the bottom left, a green checkmark icon is accompanied by the text "No credit card required". On the right side, a preview of the SVGator software is shown, featuring a dark-themed workspace with a grid, a library of pre-made loader animations, and a timeline for editing. Three white cards with icons (a blue arrow, a pink pencil, and a blue dot pattern) are overlaid on the software preview.

## CSS Loader Generator

With this online generator, you will be able to customize a CSS loader for your webpage. Just select a spinner / loader and then you will have the option to customize the color, size and speed of the CSS loader. Once completed, copy the CSS and HTML code to the clipboard. One of the largest collections of animations to select from on the web, currently we have 310 loaders.
