# wanna pass your coding interview?

best websites

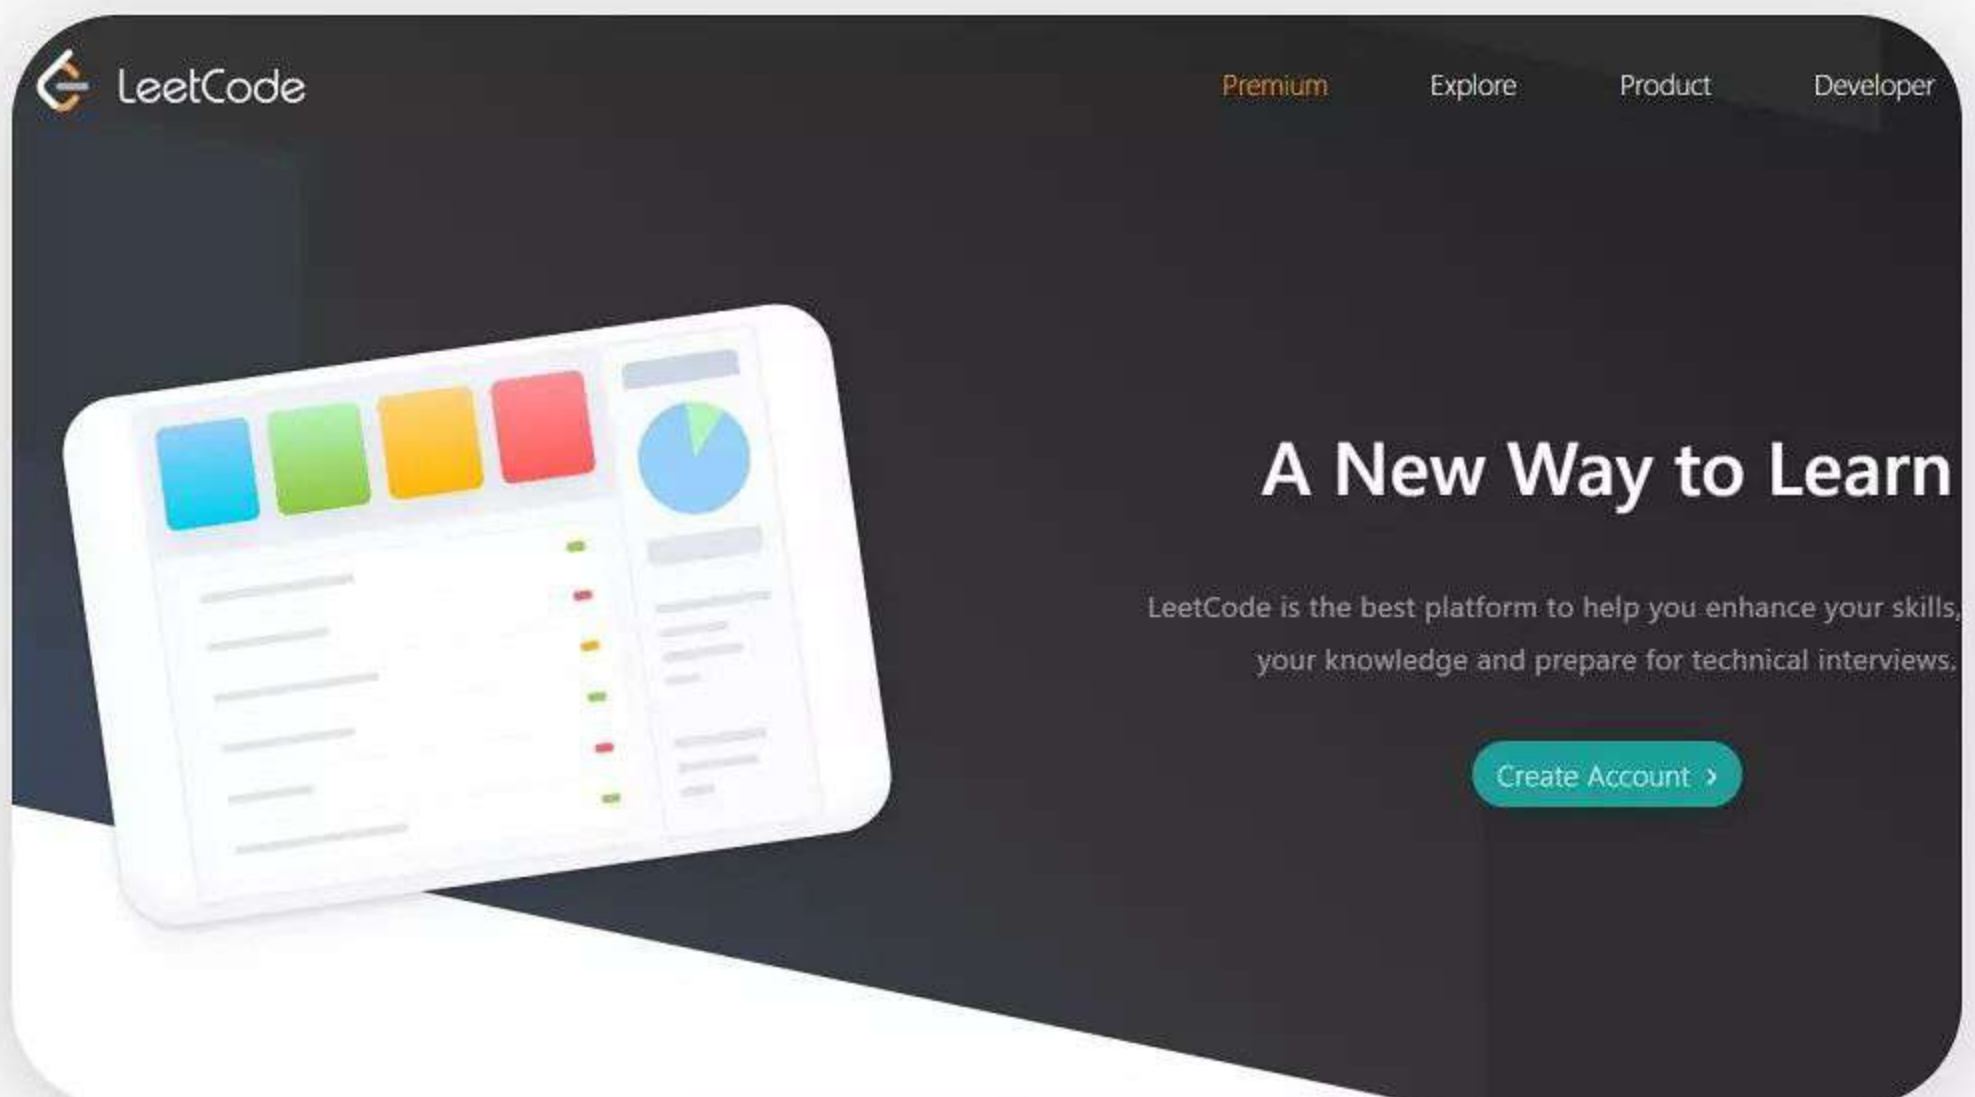

GABRIEL  
SOARES

these are the websites that'll  
help you pass your coding  
interview 

1

# Leetcode

I saw people who worked for with Leetcode for 3 to 6 months and found a job.

# HackerRank

The good thing about HackerRank is that it's also used by many companies for technical assessment and remote interview which means if you have a strong profile on HackerRank you may get matched with a suitable opportunity.

The screenshot shows the HackerRank website interface. At the top left is the 'HackerRank' logo. At the top right are 'Login' and 'Sign Up' buttons. The main heading reads 'Matching developers with great companies.' Below this, there are two columns: 'For Companies' and 'For Developers'. The 'For Companies' column includes a description of the platform as a market-leading technical interview platform and a green 'Start Hiring' button. The 'For Developers' column includes a description about joining over 15 million developers and a green 'Sign Up & Code' button. On the right side, there is an illustration of five diverse people standing in a row. Above them are three company logos: Stripe, Airbnb, and LinkedIn, with dotted lines connecting them to the group of people.
