

CSS Selectors

Vanka Suneel

CSS Selectors types

1. CSS element selector
2. CSS ID selector
3. CSS Class Selector
4. CSS Universal Selector

Vanka Suneel

CSS element Selector

When this selector applied then all HTML elements with that element will be styled based on this selector

```
* p{  
    color:black;  
    font-size:20px;|  
}
```

All paragraph elements will get black color and font size 20px here.

Vanka Suneel

CSS id Selector

```
#para{  
    color:black;  
    font-size:20px  
}
```

ID of an elemnt is unique to that page .this selector can be used to that elemnt which contains assigned id

Vanka Suneel

CSS Class selector

```
.left{  
    color:black;  
    font-size:20px;  
}
```

this selector applies all the css styles to the elements which has the class

Vanka Suneel

CSS Universal selector

```
*{  
    color:black;  
    font-size:20px  
}
```

This selector applies style to all HTML elements in the page
