

TOP 7 FREE BACKEND HOSTING PLATFORMS

Follow @PritesKiri

<https://aws.amazon.com/lambda/>

The screenshot shows the AWS Lambda landing page. At the top, there's a navigation bar with links for re:Invent, Products, Solutions, Pricing, Documentation, Learn, Partner Network, AWS Marketplace, Customer Enablement, Events, Explore More, and a search bar. On the far right of the bar are Contact Us, Support, English, My Account, and Sign In buttons, along with a prominent orange 'Create an' button. Below the navigation bar, the main header reads 'AWS Lambda' with a 'Overview' tab selected. Other tabs include Features, Pricing, Getting Started, Resources, FAQs, and Partners. A blue banner below the header promotes 'AWS Lambda SnapStart' with the text: 'Achieve up to 10x faster function startup performance, at no extra cost. Learn more ». Below this, a link '« Compute' leads back to the previous page. The main content area features the title 'AWS Lambda' and the tagline 'Run code without thinking about servers or clusters'. It includes two calls-to-action: 'Create an AWS Account' in an orange button and 'Connect with an AWS Lambda specialist' in a white button. To the right, a box highlights '1 million requests free per month with the [AWS Free Tier](#)'. The page then lists four key benefits in separate boxes: 1. Run code without provisioning or managing infrastructure. Simply write and upload code as a .zip file or container image. 2. Automatically respond to code execution requests at any scale, from a dozen events per day to hundreds of thousands per second. 3. Save costs by paying only for the compute time you use—by per-millisecond—instead of provisioning infrastructure upfront for peak capacity. 4. Optimize code execution time and performance with the right function memory size. Respond to high demand in double-digit milliseconds with Provisioned Concurrency.

<https://glitch.com/>

The screenshot shows the Glitch website homepage. At the top, there's a navigation bar with the Glitch logo, a search bar, and links for 'Discover', 'Blog', and 'Pricing'. A note says 'Glitch is now part of Fastly, and we are very excited about what this means for the community! Read the full announcement here' with a link to 'fastly'. The main headline reads: 'Glitch is the friendly place where everyone builds the web. Start a new blog, play with React, or build new worlds with WebXR. Let's go!' Below the headline is a colorful illustration of two people working on laptops under a rainbow, surrounded by butterflies and a smartphone icon.

<https://render.com/>

The screenshot shows the Render website homepage. At the top, there's a navigation bar with the 'render' logo, 'Product', 'Pricing', 'Blog', 'Docs', 'Careers', and a blue 'GET STARTED' button. Below the navigation is a large, bold headline: 'The fastest way to host all your static s|'. A subtext below the headline reads: 'Render is a unified cloud to build and run all your apps and websites with free TLS certificates, a global CDN, DDoS protection, private networks, and auto deploys from Git.' At the bottom left, there are two buttons: 'GET STARTED FOR FREE' and 'CONTACT SALES'. On the right side, there's a badge for 'TC DISRUPT STARTUP BATTLEFIELD 2019 WINNER'.

<https://fly.io/>

The screenshot shows the Fly.io homepage with a dark background. At the top left is the Fly logo (a purple bird icon) and the word "Fly.io". At the top right are navigation links: Articles, Docs, Community, Status, and Pricing. The main title "Deploy App Servers Close to Your Users" is prominently displayed in large white text. Below it, a subtitle reads "Run your full stack apps (and databases!) all over the world. No ops required." A "Try It For Free" button is visible. On the right side, there is a code block with numbered steps:

```
1 > Install flyctl on Mac OS
2 $ brew install flyctl
3
4 > Ship a Docker image
5 $ flyctl deploy
6
7 > Run it on three continents
8 $ flyctl regions add ams h
```
