END
of JavaScipt?

art by
Jonathan Rivadeneyra

so, recently there was
a huge announcment
in the Python and Web
Development World

PyCon US 2022

This is PyScript 👇

<py>

Run Python in Your HTML

```html
<html>
    ...
    <py-script> print('Now you can!') </py-script>
</html>
```

this will allow your Python Code to run in the browser

this will unlock so many thing and you'll also be able to use python libraries

You can try out the alpha version of PyScript here 👇

www.pyscript.net

<py>

Run Python in Your HTML

```
<html>
    ...
    <py-script> print('Now you can!') </py-script>
</html>
```
