JS Most Asked Question

CALLBACK

FUNCTION

Example

@code.singh　　　@sahil singh

CallBack

- **A callback function is a function that is passed to another function as an argument and is executed after some operation has been completed.**

- **Below is an example of a simple callback function that logs to the console after some operations have been completed.**

Example

```javascript
function modifyArray(arr, callback)
{
  arr.push(100);
  callback();
}

var arr = [1, 2, 3, 4,5];

modifyArray(arr, function() {

  console.log("array has been modified", arr)
;});
```
